

Site Name: MAGNESIUM ELEKTRON

Alias(es):

City: MADISON

County or Parish: MADISON

State: IL

Refer to Report Dated: 05/02/2016

EPA ID: ILN000510839

Report Developed By: STATE

State ID:

Report Type: Preliminary Assessment #001

Decision Date: 05/02/2016

- ☒ 1. Further Remedial Site Assessment Under CERCLA (Superfund) is not required because: NFRAP-Site does not qualify for the NPL based on existing information
- ☐ 2. Further Assessment Needed Under CERCLA.
- ☐ 3. Remedial study/cleanup needed.

Decision/Rationale:

The U.S. Environmental Protection Agency (EPA) has determined that no further remedial action by the Federal Superfund program is warranted at the referenced site, at this time. The basis for the no further remedial action planned (NFRAP) determination is provided below. A NFRAP designation means that no additional remedial steps under the Federal Superfund program will be taken at the site unless new information warranting further Superfund consideration or conditions not previously known to EPA regarding the site are disclosed. In accordance with EPA's decision regarding the tracking of NFRAP sites, the referenced site may be removed from EPA's Active site inventory and placed in a separate Archive site inventory as an historical record if no further Superfund interest is warranted. Archived sites may be returned to the Active site inventory if new information necessitating further Superfund consideration is discovered.

Remedial activities which have occurred at the facility have rectified any radioactive contamination which had been present at the facility. Ongoing inspections by RCRA and current permits achieved through Illinois EPA's Bureau of Land have minimized the potential for future contamination to occur. Since the site is active in these programs, it is recommended that no further CERCLA activities take place at the Magnesium Elektron site at this time.

Decision/Rationale (Continued):

Site Decision Made By: David Brauner, Acting NPL Coordinator
